

Comfort Systems is dedicated to keeping our customers informed of the latest US Environmental Protection Agency (EPA) final phase-down schedule for production of R-22 refrigerant.

What is R-22?

R-22 refrigerant is the most commonly used refrigerant in commercial HVAC equipment

How am I affected?

Since the phase down has started, you will see increases in the cost of R-22. Prices will continue to rise as production and inventory continues to decrease.

What are my options?

1. Replace current R-22 equipment with more environmentally and energy efficient systems.
2. Continue purchasing R-22 while it is commercially available.
3. Retrofit your equipment with new refrigerant options

We are here to help you make the best decision for your equipment
